I sit at an unusual intersection — part architect, part seller, fully accountable for outcomes.

Most presales professionals can articulate a solution. Most architects can design one. Few can do both in the same conversation, at board level, across a £5M+ deal with three partner ecosystems in motion. That is the work I have been doing for 15 years across Tier-1 European banks, regulated enterprises, and cloud-native transformations.

At Impetus, I built the EMEA presales function from the ground up — closing \$12M in new business over 30 months, leading marquee engagements at Barclays, Danske Bank, and Swisscom, and founding the Context Engineering initiative that now positions Impetus at the frontier of semantic-first Agentic AI.

I shape large scale and complex modernization programs— working as a forward-deploy voice of the customer, aligning product, delivery, and partner teams around what will actually win.

If you are looking for someone who combines deep technical credibility with the commercial acumen to close complex deals, I would welcome a conversation.
