Growth & Presales · Cloud & Data Modernisation · GenAI / Agentic AI

📍 Reading, UK | +44 772-115-9703 | inbravo@outlook.com | linkedin.com/in/inbravo | github.com/inbravo

EXECUTIVE SUMMARY

Results-driven Presales leader with 20+ years across enterprise architecture, cloud transformation, and data engineering. Specialist in legacy estate exits — SAS, Teradata/Netezza EDW, DataStage/Informatica ETL, Mainframe/COBOL — and GenAI/Agentic AI for regulated enterprises. Founding member of Impetus' Context Engineering initiative, focused on semantic-first AI adoption in Tier-1 banks. Trusted advisor to C-suite at Barclays, HSBC, Swisscom, and Danske Bank. Active open-source contributor on GitHub.

CURRENT FOCUS —

Founding Member, Context Engineering Initiative · Impetus Technologies [Growth & Presales]

Solving the two problems that quietly block enterprise AI in Tier-1 banks: context you can't trust, and estates too brittle to modernise.

Composite Semantic Layers

Coordinating semantically-driven artifacts across heterogeneous estates rather than chasing the universal semantic layer. OSI compliance as a non-negotiable evaluation criterion for any target architecture from 2026.

Semantic Portability

Designing exit-readiness into vendor-managed semantic layers before migration commits, not after. Snowflake Cortex, Databricks Unity Catalog, Google Agentic Data Cloud — new labels, familiar lock-in trap.

Semantic Observability

Detecting semantic drift in agent-interpreted business logic before it surfaces as a BCBS 239 / Principle 2 breach. Auditors don't accept 'the model seemed confident'.

Semantic-first Agentic AI + MCP/A2A

Agent-ready target architectures where governed semantic models are the query surface, not raw tables. Vertical (MCP) and horizontal (A2A) agent protocol adoption in BCBS 239-compliant regulated estates.

KEY ACHIEVEMENTS

\$1.5M

Databricks DCIF partner funding — highest awarded to Impetus

\$500K

AWS MAP partner funding secured for cloud migrations

£8M

Largest deal closed; avg. deal size ~£1.5M

Founding Member, Impetus Presales Practice — Built the presales function from scratch; established presales processes, asset development, and proposal governance; grew from 2 to 13 members as a fully formalised practice.

EXPERIENCE

Lead Presales Architect / Senior Solutions Architect | Impetus Technologies

Dec 2009 – Present

Presales Leadership — EMEA

- ▶ **Leading EMEA presales on cloud modernisation, data engineering, and GenAI/Agentic AI;** lead and mentor a presales team of 3
- ▶ **Secured the highest of \$1.5M Databricks DCIF and \$500K AWS MAP partner funding;** largest single deal £8M; average deal size ~£1.5M
- ▶ **Drive GTM with AWS, Databricks, and Microsoft;** own Partner Funding Programmes (MAP/D2E, ECIF)
- ▶ **Govern full proposal cycle: RFP/RFI/SOW/MSA/DPA;** active conference speaker and presales asset author

Context Engineering & Solution Architecture

- ▶ **Founding member of Impetus' Context Engineering initiative** — presales lead for semantic layer, agentic AI, and MCP/A2A propositions targeting Tier-1 European banks

- **Architect legacy estate exits:** SAS → Databricks/Snowflake; Teradata/Netezza/Oracle EDW; DataStage/Informatica/ODI ETL; Mainframe/COBOL/JCL → agent-consumable services
- **Design BCBS 239 / RegTech solutions:** machine-readable lineage contracts, semantic observability, Basel III/IV, FRTB, CRR3, COREP for regulated estates
- **Built and open-sourced a Python/LangChain RAG bot** (Chroma vector store, multi-LLM: Ollama, GPT, Claude) for enterprise knowledge management

Technical Lead | Tavant Technologies

Oct 2008 – Dec 2009

- Led design, development of a set-top box advertisement platform for a DVR [company](#)

Senior Software Engineer | Impetus Technologies

Mar 2005 – Oct 2008

- Designed carrier-grade DNS solutions for internet telephony, number portability, and number pooling [company](#)

Software Engineer | Sunup Digital Systems (acq. [Motorola Mobility](#))

Sep 2004 – Feb 2005

- Developed broadcasting domain asset management and customer billing platform

CORE SKILLS

Presales	Solution selling, RFP/RFI/SOW/MSA, POC leadership, partner funding (AWS MAP, Databricks DCIF, MS ECIF), GTM strategy
Context Engineering	Semantic layers, semantic portability & observability, MCP + A2A protocols, knowledge graphs, data contracts, BCBS 239
Legacy Exit	SAS, Teradata, Netezza, Oracle EDW, DataStage, Informatica, ODI, Talend, Mainframe/COBOL/JCL → cloud-native
Cloud & Data	AWS, Azure, Databricks, Snowflake, GCP, Spark, Hadoop, Glue, Redshift — greenfield & modernisation
GenAI / AI	LLM, LangChain, RAG, Agentic AI, vector databases (Chroma), semantic-first architectures
Architecture	TOGAF, enterprise & solution architecture, cloud transformation roadmaps, Python, Scala, Java, C++
Leadership	Presales team management (3 FTE), C-suite advisory, skill building & mentoring, executive stakeholder engagement

CERTIFICATIONS & MEMBERSHIPS

TOGAF Certified	AWS Solutions Architect	Databricks Migration	Azure Fundamentals
-----------------	-------------------------	----------------------	--------------------

Member — Association of Proposal Management Professionals (APMP)

EDUCATION

B.E. Information Technology · CCS University · First Division · 2003
